A.Zeta showerhead

Alberto Apostoli

Celebrated Italian spa and wellness architect Alberto Apostoli has partnered with Newform to create the A.Zeta showerhead. Described as the 'aesthetic representation of flowing water', it offers a signature wellness shower experience and features a segmented steel profile and studied incline to enhance water flow.

The wall-mounted A.Zeta offers rainfall and waterfall shower options, and is available in several finishes and colourways, including chrome, satin, black and white.

The design, which is suited to both commercial and residential settings, features essential lines and geometric folds as well as a thin cut for the water jet and micro-perforations for the rainfall mode.

"A.Zeta highlights water as the fundamental element of wellness: the showerhead evolves with it, simulating its movements and focusing on the individual to guarantee an authentic experience of relaxation," says Apostoli.
