INDOOR

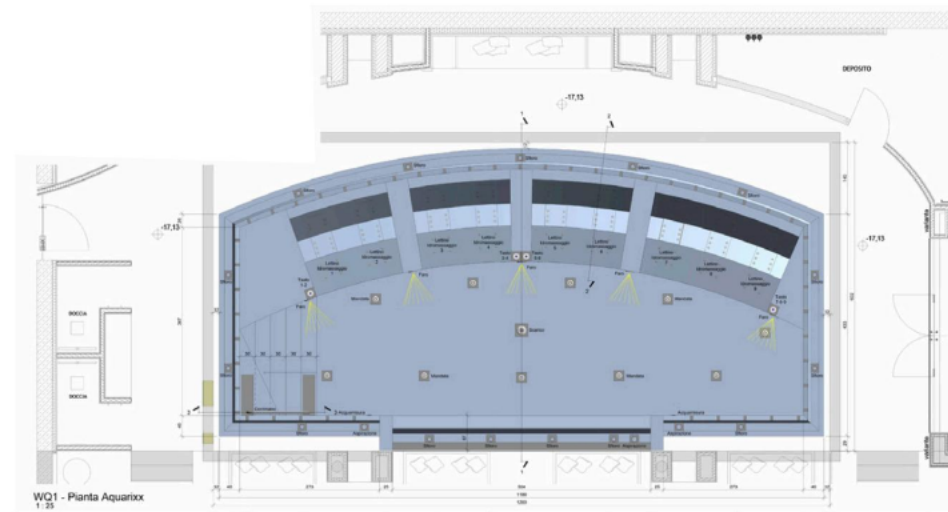

DATA SHEET

Location: Gargnano (Brescia)
Year of construction: 2022
Design: Studio Apostoli
Building construction: Hofer Group, Paterlini Costruzioni
Pool structure: Aquarixx Hofer
Shape: geometric
Surface: 62 sqm
Size: 5.51 x 11.25 m
Depth: 0.95 - 1.35 m
Internal covering: Marvel Edge Agata Azul stoneware by Atlas Concorde
External cladding: Silkstone Sand, Silkstone Tampe stoneware by Ceramiche Sant'Agostino
Solarium cladding: Silkstone Sand stoneware by Ceramiche

« The Italian pool Industry is moving towards soft geometries, smooth lines, and a strong presence of sand, wood, or vegetation »

ability, self-sufficiency can – and must – coexist together in the aquatic system, a model that's not only a construction methodology but a sum of technical devices and good practices united under an avant-garde concept that's necessary for an age when fresh and clean water is becoming an increasingly rare commodity. So, sustainability and zero impact are two more and more important concepts for Italian designers.

LIGHT MY POOL

Multifaceted, multiform, sparkling, and pure as the very essence of beauty, light is one of the most versatile and exciting architectural forms that can be moulded, set up and changed: for this reason, designers love it and use it to give pools a truly unique touch. Therefore, carefully designing the light points could bring an outstanding imprint to a pool environment and the market, for this reason, offers endless possibilities, from coloured lanterns, able to create an imaginative and captivating atmosphere, to soft golden lights, more romantic, up to luminous sculptures, as in a small personal art gallery. Light has acquired the status of an architectural element and technologies connected to illumination are very popular. Especially when they 'join forces' with water: the swimming pool, in itself, is already an evocative element, but we can move it with waterfalls, gargoyles, and geysers, with the bonus of being able to enjoy the magnificent sound of the pouring water.
