## ATLAS CONCORDE

WHAT'S NEW?

Designed by architect Alberto Apostoli for Atlas Concorde, the **Nyra** collection translates inspiration from nature, classical culture, and wellness-focused architecture into a versatile range of stone-effect surfaces for hospitality, contract, and residential projects.

Nyra showcases the material's decorative potential through varied tones, finishes, and textures. Vibrant colour variations, polychrome inclusions, subtle opacity shifts, and chiaroscuro effects create a lively, immersive material that transforms spaces into welcoming environments reminiscent of ancient craftsmanship.

Suitable for indoor and outdoor applications - including walls, floors, furniture, worktops, 3D structures, mosaics, and bespoke décor - Nyra blurs the line between interior and exterior, delivering a seamless aesthetic.

*"Nyra is a vision where material, colour, and texture work in harmony to create new spatial scenographies," says Alberto Apostoli. "The realistic surfaces, rich colours, and tactile effects evoke welcoming spaces while giving designers creative freedom and users a memorable experience. Nyra is not just a collection - it's the cornerstone of Nyra World, a programme that will guide Atlas Concorde's future stone-effect innovations."*
